

MPCA Flood Response - Baseline Household Survey

Module 1: Household Identification & Eligibility

Household ID

Enter the unique household ID from the sampling/beneficiary list.

Community / location

Enter the community or location of the household.

Enumerator ID

Enter your assigned enumerator ID.

Interview date

Record the date of the interview.

Do you agree to participate in this survey?

Explain voluntary participation, confidentiality, and the respondent's right to stop.

☐ Yes

☐ No

The respondent did not consent. End the interview.

Was this household affected by the flooding?

Apply the programme's definition of flood-affected.

☐ Yes

☐ No

This household is not flood-affected. End the interview.

Is this household eligible for the MPCA intervention?

Verify against the programme's eligibility criteria or beneficiary list.

☐ Yes

☐ No

This household is not eligible for MPCA. End the interview.

Has this household already received the MPCA transfer?

Baseline contamination check. Ideally, baseline respondents have not received the intervention.

- ☐ Yes
- ☐ No

How much MPCA did the household receive?

Enter the amount in the programme's currency.

FLAG FOR REVIEW: This household reports having already received MPCA. Review before treating it as a clean baseline record.
The record can remain in the dataset but should be flagged during cleaning.

This household has not yet received MPCA. Continue to Module 2.

Module 2 - Household Demographics

What is the total number of people who normally live in this household?

What is the sex of the household head?

- ☐ Female
- ☐ Male
- ☐ Other
- ☐ Don't know / prefer not to say

What is the age of the household head, in completed years?

Does the household include at least one person with a disability?

- ☐ Yes
- ☐ No

How many children under 5 years live in the household?

How many pregnant or lactating women live in the household?

Community / locality

What is the household's current displacement status?

- ☐ Living in own/current community
- ☐ Internally displaced
- ☐ Returned to community
- ☐ Other

Module 3 - Food Consumption Score (FCS)

FCS reference period: the past 7 days. Ask about foods eaten by most household members (50%+), inside or outside the home. Record the number of days consumed, not the number of times.

During the past 7 days, on how many days did most members of your household (50%+) eat cereals, grains, roots, or tubers (e.g. rice, pasta, bread, maize, millet, sorghum, potato, yam, cassava, plantain)?

What was the main source of this food during the past 7 days?

- ☐ Own production
- ☐ Fishing / hunting
- ☐ Gathering
- ☐ Loan / borrow
- ☐ Purchase with cash
- ☐ Purchase on credit
- ☐ Begging or scavenging
- ☐ Exchange labour or items for food (barter)
- ☐ Gift from family, relatives or friends
- ☐ Food assistance (in-kind)

During the past 7 days, on how many days did most members of your household eat pulses/legumes, nuts, or seeds (e.g. beans, cowpeas, lentils, soy, pigeon pea, peanuts, other nuts)?

What was the main source of this food during the past 7 days?

- ☐ Own production
- ☐ Fishing / hunting
- ☐ Gathering
- ☐ Loan / borrow
- ☐ Purchase with cash
- ☐ Purchase on credit
- ☐ Begging or scavenging
- ☐ Exchange labour or items for food (barter)
- ☐ Gift from family, relatives or friends
- ☐ Food assistance (in-kind)

During the past 7 days, on how many days did most members of your household eat dairy products (e.g. milk, yogurt, cheese)? Exclude margarine/butter and small amounts of milk in tea/coffee.

What was the main source of this food during the past 7 days?

- ☐ Own production
- ☐ Fishing / hunting
- ☐ Gathering
- ☐ Loan / borrow
- ☐ Purchase with cash
- ☐ Purchase on credit
- ☐ Begging or scavenging
- ☐ Exchange labour or items for food (barter)
- ☐ Gift from family, relatives or friends
- ☐ Food assistance (in-kind)

During the past 7 days, on how many days did most members of your household eat meat, fish, eggs, or other seafood? Exclude small quantities used only as condiments.

What was the main source of this food during the past 7 days?

- ☐ Own production
- ☐ Fishing / hunting
- ☐ Gathering
- ☐ Loan / borrow
- ☐ Purchase with cash
- ☐ Purchase on credit
- ☐ Begging or scavenging
- ☐ Exchange labour or items for food (barter)
- ☐ Gift from family, relatives or friends
- ☐ Food assistance (in-kind)

During the past 7 days, on how many days did most members of your household eat vegetables or leaves (e.g. spinach, onion, tomatoes, carrots, peppers, green beans, lettuce)?

What was the main source of this food during the past 7 days?

- ☐ Own production
- ☐ Fishing / hunting
- ☐ Gathering
- ☐ Loan / borrow
- ☐ Purchase with cash
- ☐ Purchase on credit
- ☐ Begging or scavenging
- ☐ Exchange labour or items for food (barter)
- ☐ Gift from family, relatives or friends
- ☐ Food assistance (in-kind)

During the past 7 days, on how many days did most members of your household eat fruits (e.g. banana, mango, papaya, apple, lemon)? Exclude packaged fruit juice.

What was the main source of this food during the past 7 days?

- ☐ Own production
- ☐ Fishing / hunting
- ☐ Gathering
- ☐ Loan / borrow
- ☐ Purchase with cash
- ☐ Purchase on credit
- ☐ Begging or scavenging
- ☐ Exchange labour or items for food (barter)
- ☐ Gift from family, relatives or friends
- ☐ Food assistance (in-kind)

During the past 7 days, on how many days did most members of your household consume oils, fats, or butter (e.g. vegetable oil, palm oil, ghee, butter, margarine)?

What was the main source of this food during the past 7 days?

- ☐ Own production
- ☐ Fishing / hunting
- ☐ Gathering
- ☐ Loan / borrow
- ☐ Purchase with cash
- ☐ Purchase on credit
- ☐ Begging or scavenging
- ☐ Exchange labour or items for food (barter)
- ☐ Gift from family, relatives or friends
- ☐ Food assistance (in-kind)

During the past 7 days, on how many days did most members of your household consume sugar or sweets (e.g. sugar, honey, jam, candy, chocolate, biscuits, pastries, cakes, ice cream, sugary drinks)?

What was the main source of this food during the past 7 days?

- ☐ Own production
- ☐ Fishing / hunting
- ☐ Gathering
- ☐ Loan / borrow
- ☐ Purchase with cash
- ☐ Purchase on credit
- ☐ Begging or scavenging
- ☐ Exchange labour or items for food (barter)
- ☐ Gift from family, relatives or friends
- ☐ Food assistance (in-kind)

During the past 7 days, on how many days did most members of your household consume condiments or spices (e.g. tea, coffee, cocoa, salt, garlic, spices, yeast, tomato paste, or small quantities of other foods such as meat/fish)?

What was the main source of these condiments during the past 7 days?

- ☐ Own production
- ☐ Fishing / hunting
- ☐ Gathering
- ☐ Loan / borrow
- ☐ Purchase with cash
- ☐ Purchase on credit
- ☐ Begging or scavenging
- ☐ Exchange labour or items for food (barter)
- ☐ Gift from family, relatives or friends
- ☐ Food assistance (in-kind)

FCS will be calculated during analysis using the standard WFP food-group weights and thresholds. We are collecting the raw 7-day frequencies here rather than hiding the calculation inside Kobo.

Module 4 - Reduced Coping Strategies Index (rCSI)

rCSI reference period: the past 7 days. Ask how many days each strategy was used because the household did not have enough food or money to buy food. Record 0 to 7 days.

In the past 7 days, on how many days did your household rely on less preferred or less expensive foods because you did not have enough food or money to buy food?

In the past 7 days, on how many days did your household borrow food, or rely on help from friends or relatives, because you did not have enough food or money to buy food?

In the past 7 days, on how many days did your household reduce the number of meals eaten in a day because you did not have enough food or money to buy food?

In the past 7 days, on how many days did your household reduce the portion size of meals because you did not have enough food or money to buy food?

In the past 7 days, on how many days did your household reduce the amount of food consumed by adults so that children could eat because you did not have enough food or money to buy food?

rCSI will be calculated during analysis using the standard WFP frequency and severity weights. We are collecting the raw frequencies here so the calculation remains transparent and auditable.

Module 5 - ECMEN Economic Capacity

Portfolio-adapted ECMEN expenditure module based on the current WFP ECMEN methodology and standardized calculation structure. It is designed for learning and portfolio demonstration; it is not a verbatim copy of the WFP Survey Designer XLSForm.

Recall periods: food = previous 7 days; short-term non-food = previous 30 days; long-term non-food = previous 6 months. Record monetary values in the survey's local currency. Values should represent consumption/expenditure for the relevant period.

For food, collect the value consumed from purchases, gifts/assistance, and own production. For non-food, collect purchases and gifts/assistance. Do not invent a monetary value for assistance; use an appropriate valuation methodology during data collection and analysis.

Household size is already captured in Module 2 and will be used to express economic capacity per capita during analysis.

» A. Food consumption/expenditure - previous 7 days

Previous 7 days: value spent on cereals using cash or credit.

Previous 7 days: estimated value of cereals consumed from gifts or in-kind assistance.

Previous 7 days: estimated value of cereals consumed from own production.

Previous 7 days: value spent on tubers/roots using cash or credit.

Previous 7 days: estimated value of tubers/roots consumed from gifts or in-kind assistance.

Previous 7 days: estimated value of tubers/roots consumed from own production.

Previous 7 days: value spent on pulses and nuts using cash or credit.

Previous 7 days: estimated value of pulses and nuts consumed from gifts or in-kind assistance.

Previous 7 days: estimated value of pulses and nuts consumed from own production.

Previous 7 days: value spent on vegetables using cash or credit.

Previous 7 days: estimated value of vegetables consumed from gifts or in-kind assistance.

Previous 7 days: estimated value of vegetables consumed from own production.

Previous 7 days: value spent on fruits using cash or credit.

Previous 7 days: estimated value of fruits consumed from gifts or in-kind assistance.

Previous 7 days: estimated value of fruits consumed from own production.

Previous 7 days: value spent on meat using cash or credit.

Previous 7 days: estimated value of meat consumed from gifts or in-kind assistance.

Previous 7 days: estimated value of meat consumed from own production.

Previous 7 days: value spent on fish using cash or credit.

Previous 7 days: estimated value of fish consumed from gifts or in-kind assistance.

Previous 7 days: estimated value of fish consumed from own production.

Previous 7 days: value spent on fats/oils using cash or credit.

Previous 7 days: estimated value of fats/oils consumed from gifts or in-kind assistance.

Previous 7 days: estimated value of fats/oils consumed from own production.

Previous 7 days: value spent on milk or dairy products using cash or credit.

Previous 7 days: estimated value of milk or dairy products consumed from gifts or in-kind assistance.

Previous 7 days: estimated value of milk or dairy products consumed from own production.

Previous 7 days: value spent on eggs using cash or credit.

Previous 7 days: estimated value of eggs consumed from gifts or in-kind assistance.

Previous 7 days: estimated value of eggs consumed from own production.

Previous 7 days: value spent on sugar/confectionery/desserts using cash or credit.

Previous 7 days: estimated value of sugar/confectionery/desserts consumed from gifts or in-kind assistance.

Previous 7 days: estimated value of sugar/confectionery/desserts consumed from own production.

Previous 7 days: value spent on condiments using cash or credit.

Previous 7 days: estimated value of condiments consumed from gifts or in-kind assistance.

Previous 7 days: estimated value of condiments consumed from own production.

Previous 7 days: value spent on beverages using cash or credit.

Previous 7 days: estimated value of beverages consumed from gifts or in-kind assistance.

Previous 7 days: estimated value of beverages consumed from own production.

Previous 7 days: value spent on snacks or meals prepared outside the home using cash or credit.

Previous 7 days: estimated value of snacks or meals prepared outside the home consumed from gifts or in-kind assistance.

Previous 7 days: estimated value of snacks or meals prepared outside the home consumed from own production.

» B. Short-term non-food expenditure - previous 30 days

Previous 30 days: expenditure on hygiene using cash or credit.

Previous 30 days: estimated value of hygiene received as gifts or in-kind assistance and consumed/used by the household.

Previous 30 days: expenditure on transport using cash or credit.

Previous 30 days: estimated value of transport received as gifts or in-kind assistance and consumed/used by the household.

Previous 30 days: expenditure on fuel using cash or credit.

Previous 30 days: estimated value of fuel received as gifts or in-kind assistance and consumed/used by the household.

Previous 30 days: expenditure on water using cash or credit.

Previous 30 days: estimated value of water received as gifts or in-kind assistance and consumed/used by the household.

Previous 30 days: expenditure on electricity using cash or credit.

Previous 30 days: estimated value of electricity received as gifts or in-kind assistance and consumed/used by the household.

Previous 30 days: expenditure on energy other than electricity using cash or credit.

Previous 30 days: estimated value of energy other than electricity received as gifts or in-kind assistance and consumed/used by the household.

Previous 30 days: expenditure on services related to the dwelling using cash or credit.

Previous 30 days: estimated value of services related to the dwelling received as gifts or in-kind assistance and consumed/used by the household.

Previous 30 days: expenditure on communication using cash or credit.

Previous 30 days: estimated value of communication received as gifts or in-kind assistance and consumed/used by the household.

Previous 30 days: expenditure on recreation using cash or credit.

Previous 30 days: estimated value of recreation received as gifts or in-kind assistance and consumed/used by the household.

Previous 30 days: expenditure on alcohol or tobacco using cash or credit.

Previous 30 days: estimated value of alcohol or tobacco received as gifts or in-kind assistance and consumed/used by the household.

» C. Long-term non-food expenditure - previous 6 months

Does the household currently pay rent for its dwelling?

☐ Yes

☐ No

Previous 6 months: expenditure on health services using cash or credit.

Previous 6 months: estimated value of health services received as gifts or in-kind assistance and consumed/used by the household.

Previous 6 months: expenditure on medicines and health products using cash or credit.

Previous 6 months: estimated value of medicines and health products received as gifts or in-kind assistance and consumed/used by the household.

Previous 6 months: expenditure on clothing and footwear using cash or credit.

Previous 6 months: estimated value of clothing and footwear received as gifts or in-kind assistance and consumed/used by the household.

Previous 6 months: expenditure on education services/fees using cash or credit.

Previous 6 months: estimated value of education services/fees received as gifts or in-kind assistance and consumed/used by the household.

Previous 6 months: expenditure on education goods/materials using cash or credit.

Previous 6 months: estimated value of education goods/materials received as gifts or in-kind assistance and consumed/used by the household.

Previous 6 months: expenditure on non-durable household furniture or utensils using cash or credit.

Previous 6 months: estimated value of non-durable household furniture or utensils received as gifts or in-kind assistance and consumed/used by the household.

Previous 6 months: expenditure on household routine maintenance using cash or credit.

Previous 6 months: estimated value of household routine maintenance received as gifts or in-kind assistance and consumed/used by the household.

Previous 6 months: expenditure on rent using cash or credit. Include this in the ECMEN calculation only if rent is included in the established MEB.

Previous 6 months: estimated value of rent received as a gift or in-kind assistance. Include only if rent is part of the established MEB.

Analysis step: convert the 7-day food values to monthly values; convert the 6-month non-food values to monthly averages; aggregate food (purchases + gifts/assistance + own production) and non-food (purchases + gifts/assistance); divide monthly household economic capacity by household size; compare per-capita capacity with the established per-capita MEB/SMEB. Do not calculate ECMEN from this form until the applicable MEB/SMEB and WFP cleaning/calculation syntax have been established.

WFP recommends standard cleaning and review of expenditure outliers before calculating ECMEN. Missing expenditure values should be handled consistently according to the standard methodology, not silently interpreted as zero without a methodological decision.

Module 6 - Assistance / Transfer Delivery

Simulated programme assumption for this portfolio: the planned MPCA transfer is fixed at 100,000 FCFA per eligible household. This is not a real programme transfer value. Module 6 is shown only when the household reports having already received MPCA.

Planned MPCA transfer amount: 100,000 FCFA per eligible household.

Please confirm: did this household receive the MPCA transfer from this programme?

This should normally be 'Yes' when Module 6 is displayed. Use programme records where available.

☐ Yes

☐ No

How much money did the household actually receive from this programme?

Enter the amount in FCFA. This should reflect the amount actually received, not the amount expected.

On what date did the household receive the MPCA transfer?

Full transfer status is calculated during data processing by comparing the actual amount received with the fixed planned amount of 100,000 FCFA.

Did the household experience any problem accessing or collecting the cash?

☐ Yes

☐ No

What type(s) of problem did the household experience?

Select all that apply.

- ☐ Payment point / agent unavailable
- ☐ Long waiting time / queue
- ☐ Distance or transport problem
- ☐ Identification / documentation problem
- ☐ Mobile money / technical problem
- ☐ Security concern
- ☐ Unexpected fee or charge
- ☐ Other

Other access problem - specify

Why did the household not receive the MPCA transfer?

- ☐ Household not found / not on beneficiary list
- ☐ Payment delayed
- ☐ Technical / payment system problem
- ☐ Identification / documentation problem
- ☐ Could not access payment point / mechanism
- ☐ Other

Other reason for non-receipt - specify

Analysis: compare actual amount received with the fixed planned amount (100,000 FCFA); assess whether the transfer was received within the programme's defined timeframe using the transfer date and the relevant programme reference date; summarize access problems. Non-receipt is monitored through Module 1 and should be analysed separately. Do not infer timeliness without a defined programme timeframe/reference date.

Module 7 - Market & Context

This module helps interpret food-security and purchasing-power results by documenting household-reported market access, availability of essential goods, and perceived price changes after flooding.

In the past 7 days, was your household able to physically access a market or shop where essential food and basic goods were available?

Consider the market/shop the household normally uses. Select 'Don't know' if the respondent cannot assess this.

- ☐ Yes
- ☐ No
- ☐ Don't know

What was the main barrier to accessing the market or shop?

Select the main barrier reported by the household.

- ☐ Flooding / water
- ☐ Road or bridge inaccessible
- ☐ Distance
- ☐ Transport unavailable or too expensive
- ☐ Market closed
- ☐ Security concern
- ☐ Other

Other market-access barrier - specify

In the markets or shops your household normally uses, were essential food and basic goods generally available during the past 7 days?

Answer based on the household's experience or knowledge of the markets/shops it normally uses.

- ☐ Yes, mostly available
- ☐ Some items unavailable
- ☐ Many items unavailable
- ☐ Don't know

Compared with before the flooding, how would you describe the prices of essential food items?

This is a household-reported perception, not a market price measurement.

- ☐ Much higher
- ☐ Somewhat higher
- ☐ About the same
- ☐ Lower
- ☐ Don't know

Interpretation: use these household-reported context variables alongside FCS, rCSI and ECMEN. Do not treat them as substitutes for objective market monitoring. Actual commodity prices and market availability should be collected through a separate market-monitoring tool.
